

AI-ENABLED ALERTS FOR SAFETY AND OPTIMIZATION

Eagle Eye Smart Alerts Feature Sheet

Enabling users to receive time-sensitive alerts at a variety of devices designed to improve your businesses safety and streamline processes.

Key Features

- **Faster Search**
 - Quickly search for safety violations
 - Opportunity to check in on staff to ensure appropriate workwear, handling of equipment, and timely arrival, to name a few examples
- **Accurate real-time Alerts**
 - Create and manage alerts with ease
 - Prevent accidents
 - Leverage AI to go beyond simple people and vehicle detection
- **Analytics and Reports (“Measure”)**
 - Schedule weekly or monthly reports
 - Measure compliance trends

At-your-fingertips alerts that make an AI-enabled difference to the end user

You can now safeguard your business with Smart Alerts utilizing AI to identify red flags and send urgent notifications. These alerts can be sent to mobile devices as well as to numerous other project management hubs, such as Microsoft Teams, Asana, and Hubspot. Move beyond tracking people and vehicles to observe details down to hardhats and safety vests with Smart Alerts, which can detect small anomalies on your sites.

Uses/Applications

- Worker Safety Monitoring alert prevents accidents
- Queue length alert provides opportunity to improve customer service
- Gun Detection improves safety
- Anomaly detection
- Face match alert
